

MSPO Certification (MS 2530:2022)

Malaysian Sustainable Palm Oil Certification

SERVICE DESIGNED TO YOUR INDUSTRY

Global Gateway Certifications (GGC) is an independent entity providing certification services to meet your business needs. Trust GGC to build on your strong track record and help create a sustainable, profitable, safe, and environmentally friendly working environment.

We conduct certification assessments in accordance with the MS 2530:2022 standard, industry targets, or your specific objectives and commitments. With our highly qualified and skilled auditors, **GGC** is equipped to assist you in enhancing your daily operations.

What is MS 2530:2022?

The MS 2530:2022 is a revised version of the Malaysian Sustainable Palm Oil (MSPO) standards, replacing the MS 2530:2013, which was launched in 2022. The revised standard aims to enhance awareness of sustainable practices and improve the capacity to implement them, which was not as developed in the previous version.

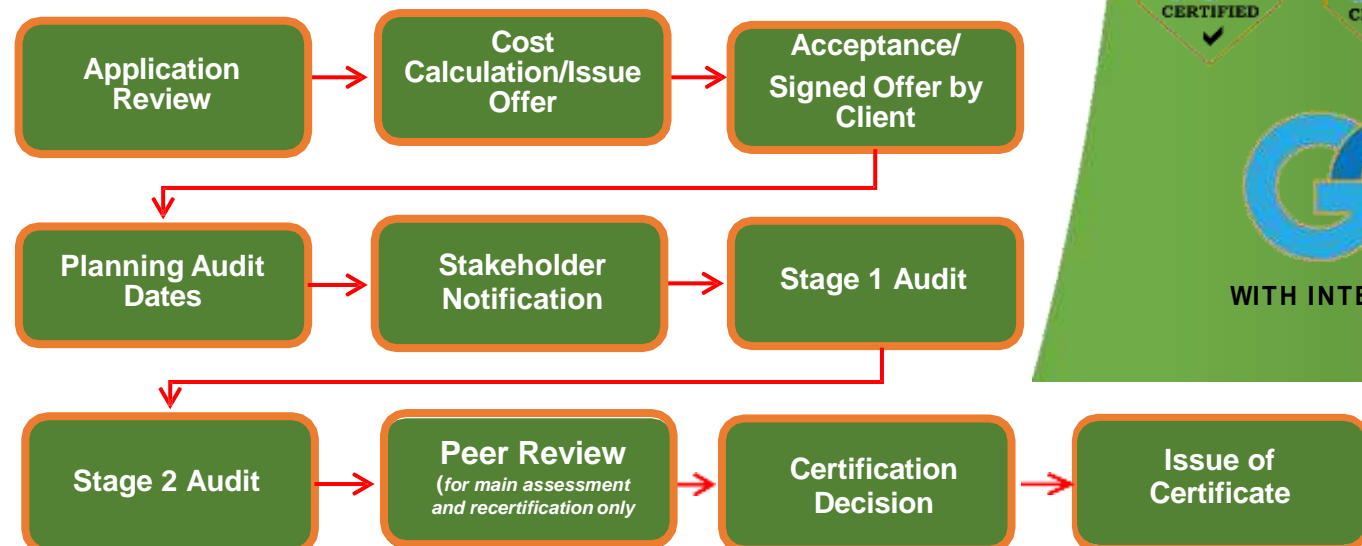

The MS 2530:2022 consists of four main parts, further divided into a total of eight separate sections. This structure addresses the differences in capacity and scale among implementers.

- **MS2530-1:2022 - MSPO Part 1: General Principles.** This part lists the general principles of the standards, providing the framework for the other parts and including terms and definitions used throughout the standards. It does not contain requirements for assessing conformity.
- **MS2530-2-1:2022 - MSPO Part 2-1: General Principles for Independent Smallholders (less than 40.46 hectares).** This part contains requirements for assessing conformity for independent smallholders against the MSPO. Independent smallholders are individual farmers who own or lease less than 40.46 hectares (100 acres) of oil palm smallholdings and manage them themselves.
- **MS2530-2-2:2022 - MSPO Part 2-2: General Principles for Organised Smallholders (less than 40.46 hectares).** This part contains requirements for assessing conformity for organised smallholders against the MSPO. Organised smallholders are individual farmers who own or lease less than 40.46 hectares of oil palm smallholdings, with the holdings managed by government agencies such as FELDA, RISDA, FELCRA, SALCRA, SLDB, and other organisations.
- **MS2530-3-1:2022 - MSPO Part 3-1: General Principles for Oil Palm Plantations (40.46 hectares to 500 hectares).** This part contains requirements for assessing conformity for small oil palm estates ranging from 40.46 to 500 hectares.

- **MS2530-3-2:2022 - MSPO Part 3-2: General Principles for Oil Palm Plantations (more than 500 hectares).** This part contains requirements for assessing conformity for large oil palm estates or plantations with areas exceeding 500 hectares.
- **MS2530-4-1:2022 - MSPO Part 4-1: General Principles for Palm Oil Mills Including Supply Chain Requirements.** This part contains requirements for assessing conformity for palm oil mills, including sustainable management and supply chain requirements.
- **MS2530-4-2:2022 - MSPO Part 4-2: General Principles for Palm Oil Processing Facilities Including Supply Chain Requirements.** This part contains requirements for assessing conformity for palm oil processing facilities, such as crude palm oil (CPO) and palm kernel (PK) processing facilities, including sustainable management practices and supply chain requirements.
- **MS2530-4-3:2022 - MSPO Part 4-3: General Principles for Dealers Including Supply Chain Requirements.** This part contains requirements for assessing conformity for fresh fruit bunch (FFB) dealers and palm oil traders, including exporters and importers, who purchase and sell oil palm products without altering their chemical properties. It includes sustainable management and supply chain requirements.

Compared to the revised standard, Principles 1 to 5 in MS2530:2022 are very similar to those in MS2530:2013. Principle 6 from the MSPO 2013 has been integrated into Principles 1, 2, 4, and 5. The requirements for new plantings have been strengthened and incorporated primarily into Principle 1, with supporting requirements in Principles 4 and 5. The MSPO Supply Chain standard has been removed and integrated into the MSPO Part 4 series.
