MSPO Certification (MS 2530)
# Malaysian Sustainable Palm Oil Certification

The 7 Principles of the MS 2530 Standards

The MSPO Standards contains seven (7) principles which form the general requirements of a management system framework, based on the three pillars of sustainability; economically viable, socially acceptable, and environmentally sound. The general requirements are as follow:

Principle 1	Management commitment and responsibility
Principle 2	Transparency
Principle 3	Compliance to legal requirements
Principle 4	Social responsibility. health, safety and employment conditions
Principle 5	Environment, natural resources, biodiversity and ecosystem services
Principle 6	Best practices
Principle 7	Development of new planting

Each of the seven (7) General Principles hove specific criteria and indicators that the Certification Bodies (CBs) will use during audit to determine compliance. The management of the entity that meets the requirements of the MSPO will be able to obtain certification under the standard.

SERVICE DESIGNED TO YOUR INDUSTRY

Global Gateway Certifications (GGC) will be responsible for a certification services to satisfy your business.

Trust **GGC** to expand your good records to produce sustainable, profitable, safe and green working environment at your workplace.

We do certification assessment in accordance to the MS 2530 standard, industry target or your own objectives and commitments.

GGC has the solution to meet, with highly qualified and skillful auditors, we able to help you improve what you do daily.

What is MS 2530?

MS 2530 is a Malaysian Standard comprises of four parts:

- MS 2530-1 General principles
- MS 2530-2 General principles for independent smallholders
- MS 2530-3 General principles for oil palm plantations and organized smallholders
- MS 2530-4 General principles for palm oil mills

The MS 2530:2013 series of standards issued by the Department of Standards Malaysia (DSM) is a set of MSPO Malaysian Standards that stipulates the general principles on certification requirements for oil palm smallholdings, plantations and palm oil processing facilities to ensure that the palm oil products are produced in a responsible and sustainable.

WITH INTEGRITY WE SERVE

Malaysian Sustainable Palm Oil Supply Chain Certification Standard (MSPO SCCS)

The Supply Chain Models:

1. Segregation Supply Chain Model

The Segregation (SG) Model assures that MSPO certified palm oil products delivered to the end users come only from MSPO SG certified sources. It permits the mixing of certified palm oil products from a variety of MSPO SG certified sources.

2. Mass Balance Supply Chain Model

The Mass Balance (MB) Model administratively monitors the trade of MSPO certified palm oil products throughout the entire supply chain. MB can only be operated at site level (mass balance claims cannot be transferred from site to site administratively). The MB Model allows for mixing of MSPO and non-MSPO certified palm oil products at any stage in the supply chain provided that overall site quantities are controlled.`

SERVICE DESIGNED TO YOUR INDUSTRY

Global Gateway Certifications (GGC) will be responsible for a certification services to satisfy your business.

Trust **GGC** to expand `your good records to produce sustainable, profitable safe and green working environment at your workplace.

We do certification assessment in accordance to the MSPO SCCS standard, industry target or your own objectives and commitments.

GGC has the solution to meet, with highly qualified and skillful auditors, we able to help you improve what you do daily.

What is MSPO SCCS?

MSPO SCCS is a Malaysian Standard that covers the management requirements and traceability of the production throughout the supply chain from the raw materials to processing and manufacturing of palm oil and palm oil-based products. Each group of players must perform their respective roles and undertake responsibility to enable traceability of all activities throughout the palm oil supply chain.

The MSPO SCCS is designed to deliver confidence and credibility to the customers and end users that the palm oil raw material originates from sustainably managed oil palm planted areas.
